

SURESHKUMAR P

CYBER SECURITY & CLOUD ENGINEERING

Vaikundam, Salem, Tamilnadu | sureshkumar555164@gmail.com | www.linkedin.com/in/suresh-kumar-704559338

EXECUTIVE SUMMARY

Motivated fresher with strong knowledge of Cloud Fundamental, Networking, Linux, Python and SQL, along with a practical working understanding of AWS services. I have gained a couple of months of internship experience, where I worked on real-time projects, helping me understand how cloud and IT systems operate in real-world environments. Known for good problem-solving ability, teamwork, and basic team coordination, with a continuous learning mindset and a strong interest in contributing effectively to cloud & security-focused roles.

TECHNICAL SKILLS

- **AWS Core Services** – EC2, S3, Lambda, DynamoDB, AWS Health Dashboard
 - **AWS Networking (VPC)** – VPC architecture, Subnets, Route Tables, Internet Gateway, Elastic IP, Security Groups
 - **Cloud Security & Access Control** – IAM users, roles, policies, least-privilege access, basic security best practices
 - **Networking Basics** – TCP/IP, Layer 2 & Layer 3 concepts, foundational network troubleshooting
 - **Linux Systems & Services** – Command-line operations, file permissions, Syslog, Samba, server-level operations
 - **Monitoring & Observability** – Prometheus, Grafana (metrics collection, dashboards, basic alert understanding)
 - **Programming & Scripting** – Python, HTML, CSS (basics, scripting, automation)
 - **Database Fundamentals** – SQL, relational database concepts, basic querying
-

INTERNSHIP PROJECTS

- **AWS S3 Website Hosting** – Hosted a simple college admission form as a static website using AWS S3 with proper access permissions.
 - **AWS VPC Networking** – Created a VPC with subnets, route tables, and an internet gateway, and securely connected EC2 instances.
 - **VPC Peering Setup** – Implemented VPC peering to enable communication between EC2 instances across two different VPCs.
 - **Linux File Sharing (Samba)** – Configured a Samba server for file sharing between Linux and Windows systems with proper user permissions.
 - **System Monitoring (Prometheus & Grafana)** – Deployed Prometheus and Grafana on an AWS EC2 instance to monitor CPU, memory, disk, and system logs.
 - **Python Projects** – Developed an Expense Tracker, ATM Interface, and Password Strength Checker using Python for logic building and automation.
 - **Dockerized SQL Application** – Built and ran a simple SQL-based application using Docker images and containers on Linux.
-

CERTIFICATIONS

- **SkyLena Info Technology Pvt. Ltd., Coimbatore** – Completed a couple of months internship in Cloud Security Engineering with real-time project and problem-solving experience.
 - **AI-TERAHACK** – Participated in a 24-hour hackathon.
 - **CTF Competition** – Won 3rd Prize in Spring Fest 2K25 at KSR College.
 - **Corizo Edutech Private Limited** – Attended a couple of months online internship in Cloud Computing.
 - **EC-Council** – Completed Python for Absolute Beginners certification.
 - **MongoDB** – Participated in a 24-hour college-level hackathon.
-

EDUCATION

Mahendra Engineering College (Autonomous) - Namakkal

- B.E - Cyber Security
- CGPA: 7.82 | Excepted Graduation: May 2027

Dheran Vidhyaalayaa Matric Hr.Sec.School - Salem

- Secondary Education
